

PRICES

OFFERED SERVICE	Cost/ sample external	Cost/ sample internal
1. Lipoproteins and glycoproteins profiling of intact serum by nuclear magnetic resonance (hereinafter NMR)	70€	50€
2. Profiling of low molecular weight metabolites and lipids in biofluids (serum, urine, saliva, etc.), and/or cell extracts and/or animal tissue extracts by NMR.	70€	50€
3. Untargeted analysis of low molecular weight metabolites and lipids in biofluids (serum, urine, saliva, etc.), and/or cell extracts and/or animal tissue extracts by GC / LC-MS.	80€*	50€
4. Targeted analysis of a determined number of metabolites by LC-MS or GC-MS. Absolute or relative quantification.	between 30€ and 100€	between 20€ and 60€
5. Analysis of metabolic fluids using stable isotope labeling, and measurement by NMR, LC-MS or GC-MS.	70€*	45€
6. Analysis of metabolomic images by mass spectrometry.	between 100€ and 200 €**	between 75€ and 150€

Prices include: preparation of the samples, reagents and consumables used, as well as the associated personnel costs.

* This type of analysis does not include the personnel cost associated with the data processing process. In the case of scientific collaborations, the cost of associated personnel will not be charged. If no collaboration is established, said cost will be € 750 / week.

** Depending on the resolution of the image.
