

INTERNATIONAL CALL IC75_22

JOB TITLE

Two years contract for a postdoctoral researcher in Oncological Pathology and Bioinformatics research group at Hospital de Tortosa Verge de la Cinta.

Researcher career profile (R2)

JOB DESCRIPTION

The researcher will be involved in a project which the main scope is to identify specific patterns of immune biomarkers in the primary tumour and in the ALN that could predict long-term risk of relapse.

The research team includes members of the principal hospitals of the province of Tarragona working as pathologists, oncologists, biologists and informatics specialists that have participated in national and international studies in Spain and in Europe with the main objective of improving the response to treatment, survival and relapse in lymphomas and BC patients.

«Esta convocatoria de personal es parte del proyecto TED2021-130081B-C22, financiado por MCIN/AEI/10.13039/ 501100011033 y por la Unión Europea "NextGenerationEU"/PRTR»

«This personnel call is part of the TED2021-130081B-C22 project, financed by MCIN/AEI/10.13039/ 501100011033 and by the European Union "NextGenerationEU"/PRTR»

The selected candidate will perform the following tasks:

- Collection of biopsies from the different participating organizations or their respective biobanks.
- Selection of the representative areas in the tumour and in the axillary lymph nodes for the preparation of the tissue microarrays.
- Scanning of the histological slides stained with immunological markers.
- Evaluation of image analysis methods for the quantification or evaluation of WSI.
- Statistics analysis evaluating the correlation/association of immune markers studied in histological slides with the patients' outcome.

- To write scientific articles.

CANDIDATE PROFILE

- Degree in Biotechnology
- The researcher must have a Doctorate degree (PhD) in Biotechnology
- Additional training related to the field of immunology.

REQUIREMENTS

- Speaking and written english skills (minimum level B2)
- Master degree related to immunology.
- Minimum 5 years demonstrable of research experience in the biosensors and immunoassays field.
- Competence and experience in immunology projects will be valued positively.

IT WILL BE VALUED

- Knowledge of statistics
- Motivation, creativity, initiative and proactive attitude.
- Ability to learn, flexibility and adaptability.
- Commitment to quality, to optimizing resources and to achieving results.
- Previous experience in similar projects.
- Ability to identify and solve problems.
