

INTERNATIONAL CALL IC46_25

JOB TITLE

NURSERY PERSONNEL for Route2Spain: “improving Clinical Outcomes in Severe Asthma Through technology – Assisted Follow-up: Pilot implementation.

JOB DESCRIPTION

This job position belongs to the Pneumology Department lead by Dr. Perelló.

The IISPV is an institution that integrates research in the field of biomedicine in the “Camp de Tarragona” and the “Terres de l’Ebre”, in order to manage biomedical research and innovation in the territory.

The job position is linked to the international research project: The Route2Spain project is a multicenter study that evaluates the efficacy of the UpHill® digital platform to improve the control of severe asthma through technology-assisted monitoring. The main objective is to increase symptom control and quality of life in patients with severe or difficult-to-control asthma, reducing exacerbations and hospitalizations. The research is being carried out in three Spanish university hospitals and includes 150 patients. Monitoring is done through monthly questionnaires and digital tools that allow personalized risk stratification. The project is committed to the integration of technology in the healthcare of chronic patients. The assistant will provide support in data management, patient monitoring and coordination with the research team.

The Route2Spain project has received co-funding from the European Institute of Innovation and Technology (EIT) Health and the European Union under Grant Agreement 250028.

Co-funded by the
European Union

Number of available positions: 2

The selected candidate will perform the following tasks:

- Supporting the coordination and operational aspects of this clinical trial.
- Organizing and maintaining patient records and study documentation in compliance with regulatory requirements.
- Collaborating with investigators, clinical staff, and other team members to ensure smooth trial conduct.

- Managing study logistics such as scheduling visits, preparing study materials, and tracking patient follow-up.
- Ensuring data entry accuracy and timely reporting of trial-related activities.
- Perform the complementary tests necessary for the study (spirometry, FENO, inhaler education, clinical control test)
- Visit to the support nursing department in cases of exacerbation, reinforcement, etc.
- Organize in-person or online medical visits
- Monitoring of medical incidents reported by patients
