Tuesday, 25 November 2025

Latest news:

- **2024 EU4Health Work Programme: Discover new projects working on cancer prevention and early detection.** Many new projects funded under EU4Health 2024 calls for proposals have recently started. Supporting Europe's Beating Cancer Plan, 17 new projects will focus on cancer prevention and early detection.
 - **New Fact Sheet: Intellectual Property Management in Marie Skłodowska-Curie Actions.** Effective management of intellectual property (IP) is a cornerstone of success for any project funded under the Horizon Europe framework programme. The Marie Skłodowska-Curie Actions (MSCA) are no exception. Participants are strongly encouraged to familiarise themselves with the relevant IP rules and to develop a tailored strategy for the protection and exploitation of research results and intellectual property generated within their projects.

SEEKING FOR PARTNERS - CANDIDATES

In this section you will find collaboration offers or requests posted by different research groups through the Crowdhelix platform. **Before contacting them, you first need to [register your profile](#) in Crowdhelix or reach out through the project managers of your institution.**

Seeking project coordinator and partners: Understanding, anticipation, and prevention of climate-related cardiovascular disease (CVD) risks

Topic: Health, Mission Climate, Vascular

Host Organization: Kneia

Seeking/Offering: KNEIA is seeking a project coordinator and partners to participate in the CLIMHEART project to improve the understanding, anticipation, and prevention of climate-related cardiovascular disease (CVD) risks, specifically focusing on heart attacks, arrhythmias, and strokes, by integrating mechanistic research, high-resolution longitudinal data, predictive modelling, and evidence-based intervention strategies.

TOPIC “HORIZON-HLTH-2026-01-ENVHLTH-01: Towards a better understanding and anticipation of the impacts of climate change on health” indicates: “The climate crisis poses an existential challenge to planetary and human health with larger effects on vulnerable populations, groups and regions. Climate change increases the incidence of non-communicable diseases and the prevalence of mental health conditions and facilitates the emergence and spread of infectious diseases. Climate change can act as a risk multiplier and exacerbates existing health conditions and vulnerabilities. (...) Non-Communicable Diseases (NCDs) and/or individual safety (e.g. injuries or fatalities), excluding mental health aspects: proposals should explore evidence on the complex interactions between climate change (e.g. changes in the frequency and intensity of extreme weather events) and NCDs and individual safety, which often involve multiple climate exposure pathways and compound and cascading climatic events”.

Seeking for partners: IMREG-2025 INFOME

Topic: Health, Society, Citizen Science, Inclusion

Host Organization: Institut de Recerca Biomèdica de Lleida - Fundació Dr. Pifarré (IRBLleida)

Seeking/Offering: We are seeking collaborators for ROOTS, a transnational initiative led by IRBLleida aimed at bringing biomedical research and science communication to rural and mountain communities.

This collaboration opportunity is open to research institutions, universities, science communication organizations, and community-oriented interested in participatory science, citizen engagement, and health education.

We aim to co-design and implement interactive workshops, citizen science activities, and multilingual outreach materials that connect biomedical research with rural communities. The collaboration seeks to:

- Expand the reach and impact of biomedical research in underserved areas.
- Promote citizen participation and co-creation of science activities.
- Increase visibility of EU-funded research and cohesion policy in peripheral regions.

We are particularly looking for partners with experience in:

- Science communication and public engagement, especially in rural contexts.
- Biomedical research translation or health education.
- Citizen science methodology and participatory research.
- Multimedia content production (videos, podcasts, infographics) for diverse audiences.
- Network building and dissemination of educational initiatives at a European scale.

RESEARCH PROJECTS

Research Grant

Topic: Cystic Fibrosis

Organized by: Cystic Fibrosis Foundation

Destination: Supports efforts that will improve the understanding of disease pathogenesis and help identify new treatment strategies for Cystic Fibrosis.

Budget: Up to 150.000\$ per year.

Duration: Up to 2 years.

Deadline: Tuesday, 09 December 2025

[More information](#)

Basic Biology Consortia

Topic: ALS

Organized by: Target ALS Foundation

Destination: Provides support to proposals from collaborative groups focused on the discovery and development of novel disease progression and stratification biomarkers using any modality.

Budget: 130.000\$ per lab, per year maximum. The total budget for a collaborative project cannot exceed a maximum of 500.000\$ per year

Duration: Two-year period.

Deadline: Wednesday, 17 December 2025

[More information](#)

Common Mechanisms in Autoimmunity Insight Awards

Topic: Autoimmune Diseases

Organized by: Breakthrough T1D, Lupus Research Alliance, and the National Multiple Sclerosis Society

Destination: Aims to establish proof-of-concept research toward the collaborative advancement of innovative ideas and therapeutic approaches that address needs and knowledge gaps across multiple autoimmune diseases.

Budget: Up to 150.000\$ (up to 10% indirect costs included).

Duration: 1 year

Deadline: Thursday, 18 December 2025

[More information](#)

Research Grants

Topic: Dermatology

Organized by: Leo Foundation

Destination: Supports the best dermatology research projects worldwide.

Budget: Between 2M-4M DKK (approx. 267.812€-535.624€).

Duration: 1 to 3 years.

Deadline: Thursday, 08 January 2026

[More information](#)

Prevent-OO

Topic: Obesity

Organized by: ERA4Health

Destination: Supports transnational research to reduce overweight and obesity in Europe by improving understanding of understudied mechanisms and enabling tailored prevention and treatment strategies.

Budget: ISCI contribution: 600.000€

Duration: from 24 months to 36 months..

Deadline: Wednesday, 21 January 2026

[More information](#)

CAREER OPPORTUNITIES

Visiting Researchers

Topic: Mobility

Organized by: Leo Foundation

Destination: Supports temporary embedment of skin researchers in a foreign research environment, fostering collaborations between Danish and international skin research communities.

Deadline: Tuesday, 13 January 2026

[More information](#)

Palliative Care Fellowship

Topic: Mobility

Organized by: ESMO

Destination: Provides oncologists with additional training and experience in palliative care, allowing them to spend an intense period of observation at one of the European Society for Medical Oncology (ESMO) accredited centres.

Deadline: Friday, 30 January 2026

[More information](#)

AWARDS

ALBA-FKNE Diversity Prize

Topic: Brain

Organized by: ALBA Network

Destination: With this Diversity prize, the ALBA Network and the FENS-Kavli Scholars wish to highlight a scientist that has made outstanding contributions to promoting equality and diversity in the brain sciences.

The promotion of equality and diversity — e.g. by gender, race, sexual orientation, class, or culture — in research depends upon leaders and role models that catalyse a full integration of all scientists across academic levels. This annual award will recognise an individual that has made outstanding contributions to this effort, including but not limited to advocacy, mentorship or the creation of diversity-promoting initiatives.

Budget: The awardee will receive €2000 in prize money for personal use, as well as additional financial support to cover travel and participation in the conference at which the prize will be presented.

Deadline: Thursday, 8 January, 2026

[More information](#)

Boehringer Ingelheim FENS Research Award

Topic: Neuroscience

Organized by: FENS&Boehringer Ingelheim

Destination: The award is given in recognition of outstanding and innovative scientific work from all areas of neuroscience research.

Budget: 25.000 Euro

Deadline: Friday, 12 December, 2025

EVENTS

ERC Annual Conference: Frontier research for One Health

Topic: Health

Organized by: European Research Council

Destination: This conference will bring together leading scientists, policymakers and stakeholders to showcase how ERC-funded frontier research is tackling pressing global challenges through the lens of One Health. It will highlight how cutting-edge discoveries can drive real-world solutions, shape policy, and foster collaboration across disciplines - turning scientific breakthroughs into tangible impact for society and the environment.

Date & place: 28 January 2026 8.30 - 18.00 CEST

Covent Garden, Place Rogier 16, Brussels (25th floor) and online

[More information](#)

Conference on Research Careers 2025 and Conference on Freedom of Scientific Research

Topic: Scientific Research

Organized by: European Commission

Destination: The Conference on Research Careers 2025 will explore how Europe can build a more sustainable, excellent and free environment for all researchers. Building on the success of previous editions, this year's conference will bring together policymakers, research professionals and stakeholder networks to discuss how policies and initiatives can shape the future of research careers in Europe and beyond.

Date & place: 10 December 2025 - 12 December 2025 10:00 (GMT+01:00)

[More information](#)

TRAINING

EU Webinar: Navigating IP in Collaborative research

Topic: Intellectual Property

Organized by: European Commission

Destination: This webinar aims to give you a basic understanding of how to properly deal with intellectual property issues and learn about common pitfalls and IP challenges in EU-funded research and innovation initiatives .

Date & place: Thursday 11 December 2025, 13:00 - 14:30 (CET)

[Registration](#)

EP PerMed Hackathon – the Use of non-invasive Biomarkers within Personalised Medicine Approaches

Topic: Personalised Medicine

Organized by: EP PerMed

Destination: The Hackathon will bring together interdisciplinary teams of researchers, innovators, engineers and clinicians to address relevant challenges in personalised medicine, and will explore novel uses and approaches of non-invasive biomarkers. Participants will focus on the ideation of solutions that improve patient outcomes and experiences. In addition, the event will provide a platform for participants to network and build meaningful partnerships.

Date & place: 3 to 4 March 2026 in Oostende, Belgium
